Office Action Summary	Examiner	Art Unit			
	Alvin J. Stewart	3738			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
 Responsive to communication(s) filed on <u>01 November 0706</u>. This action is FINAL. 2b) This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i>, 1935 C.D. 11, 453 O.G. 213. 					
Disposition of Claims

Response to Arguments

Applicant's arguments filed 11/07/07 have been fully considered but they are not persuasive.

The meaning of the word comonomer is the following: one of the compounds that constitute a copolymer. Therefore, the Examiner believes that the reference still reads on the claims because the two compounds mentioned in the claim are part of a copolymer.

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the word carboxylic acid comonomer is not disclosed in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 44-54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The word ethylene comonomer is not disclosed in the specification. Correction is required.

Application/Control Number: 10/712,678 Page 3

Art Unit: 3738

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on

sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 44-46 and 53-54 are rejected under 35 U.S.C. 102(b) as being anticipated by

Wang et al US Patent 5,631,328.

Wang et al discloses a method of making a coat having the step of adding a copolymer of

comonomer ethylene with a carboxylic acid comonomer to a solvent system to form a

composition (see col. 2, lines 52-60); applying the composition to an implantable medical device

(see col. 17, lines 38-42) and allowing the solvent system to evaporate (see col. 8, lines 62-65).

The meaning of the word comonomer is the following: one of the compounds that constitute a

copolymer. Therefore, the Examiner believes that the reference still reads on the claims because

the two compounds mentioned in the claim are part of a copolymer.

Regarding claim 45, see col. 3, lines 43 and 54.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

Claims 47, 48 and 50-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Wang et al US Patent 5,631,328 in view of Chabrecek et al US Patent 6,087,412.

Wang et al discloses the invention substantially as claimed. However, Wang et al does not disclose a solvent system made of toluene.

Chabrecek et al discloses a solvent made of toluene for the purpose of having an inert solvent (see col. 9, lines 65-67).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the solvent of the Wang et al reference with the toluene solvent of the Chabrecek et al reference in order to have an inert solvent.

Regarding claims 50-52, disclose the claimed invention except for having a carboxylic acid comonomer between 5 to 50 percent by weight. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the percentage by weight of the copolymer, since it has been held that finding an optimum value of a result effective variable involves only routine skill in the art. In re Boesch, 617 F. 2d 272, 205 USPQ 215 (CCPA 1980).

Claim 49 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang et al US Patent 5,631,328 in view of Kliment et al US Patent 4,729,914.

Wang et al discloses the invention substantially as claimed. However, Wang et al does not disclose a chlorinated solvent.

Kliment et al teaches a copolymer having a solvent and the solvent is chlorinate for the purpose of obtaining an organic liquid which is relatively easy to evaporate at room or slightly elevated temperatures (see col. 4, lines 4-14).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Wang et al reference with the Kliment reference in order to

obtain an organic liquid which is relatively easy to evaporate at room or slightly elevated temperatures.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J. Stewart whose telephone number is 571-272-4760. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
